

catoolRT 15.6 Release Notes

Changes since 15.3:

- Option to interpolate encoderless data
- In analysis configuration, add "Valve Timing" and "Injector Timing" types
- Add "Positive Heat Release" as a start of combustion type
- Prevent application hanging on exit
- Add spinner to status bar to indicate acquisition in progress
- Indicate in status bar if catoolRT under remote control
- Add Alt+number as keyboard shortcut for data sources
- Improvements to display update rate
- Add camshaft synchronisation to interpolate clock acquisition
- Add CAN input logging
